

# IMPORTANT! READ THE FOLLOWING INSTRUCTIONS CAREFULLY AND RETAIN FOR FUTURE REFERENCE. GB

WARNING - Incorrect installation can be a safety hazard.

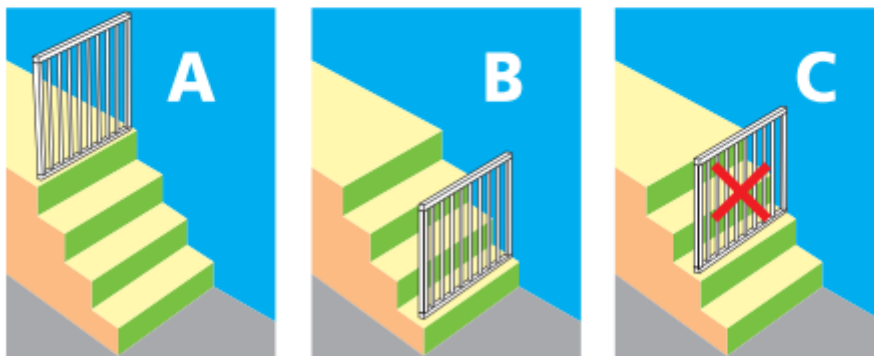

WARNING - The safety lattice for children must not be used in case of damage or loss of individual parts.

WARNING - Do not install this child safety gate across windows.

**WARNING - Always use the suction cups provided.**

## CAUTION!

- This child safety gate is intended for domestic use only.
- This safety gate is equipped with a manual locking system.
- Always check that the safety gate is locked/latched properly.
- This door guard is intended for children aged up to 24 months. As children develop at different rates, this is only a guide.
- The safety gate must only be installed between solid, clean and smooth door jambs / walls.
- The stair safety gate must only be fitted between two solid elements (stair rail and wall).
- Older children might climb over the gate.
- Never leave your child unattended, this is the best way of protecting it from accidents.
- Once installed, check against the instructions that the safety gate is firmly installed and functioning.
- Regularly check that the gate is firmly in place, that it is in a good general condition and that the locking mechanisms function.
- Only spares supplied by the manufacturer are to be used.
- Please check regularly that no screws have worked loose ! Retighten the screws, if necessary.
- To clean, use warm water only.
- If fitted properly, the safety gate conforms to EN 1930 : 2011.

## GB WARNING

- An incorrect assembly or positioning of this safety lattice for children can be dangerous.
- If the safety gate is being used at the top of the stairs to prevent children from falling it should be installed on the landing, not on one of the steps ( Position " A " ). If the safety gate is to be used at the bottom of the stairs to prevent a child from climbing up, then it should be installed in the front on the bottom step. ( Position „ B „ )
