

This versatile product is suitable for day care centers, bath- and utility rooms, public child care facilities, vestibules and other spaces with a handheld shower head and floor drain.

Babystanderi improves the well-being of adults and children when you wash and care for your child.

A designated washing place improves hygiene, and the basin offers privacy and security when the child's being washed and cared for. The child may also sit, bathe and play in the water. Thanks to sewerage, the floor remains dry.

The plastic material is warm, and the rounded design is comfortable for both the child and the adult.

The product may be used as an aid when dressing and undressing your child.

When the weather's bad, the child may be rinsed with his/her muddy rainwear on and undressed in the basin.

The holes in the upper corners may be used for supporting the child when needed.

When the child is washed and cared for in the Babystanderi, you only need a handheld shower head instead of faucets. It is easy to use even on the front side of the child.

## PRODUCT SPECIFICATIONS:

\*height 119 cm

\*bottom diameter on floor level 54.6 cm

\* BASIN:

- on a height of 34 cm from the floor
